

CFA Model Fit: $S/B\chi^2(695) = 1185.227$, $p \leq .001$, N-NFI = .926, CFI = .934, RMSEA = .043 (90%, CI .039 to .047)
Partial Medial Model Fit: $S/B\chi^2(741) = 1368.092$, $p \leq .001$, N-NFI = .905, CFI = .914, RMSEA = .048 (90%, CI .044 to .052)
Full Medial Model Fit: $S/B\chi^2(743) = 1369.646$, $p \leq .001$, N-NFI = .905, CFI = .914, RMSEA = .048 (90%, CI .044 to .052)

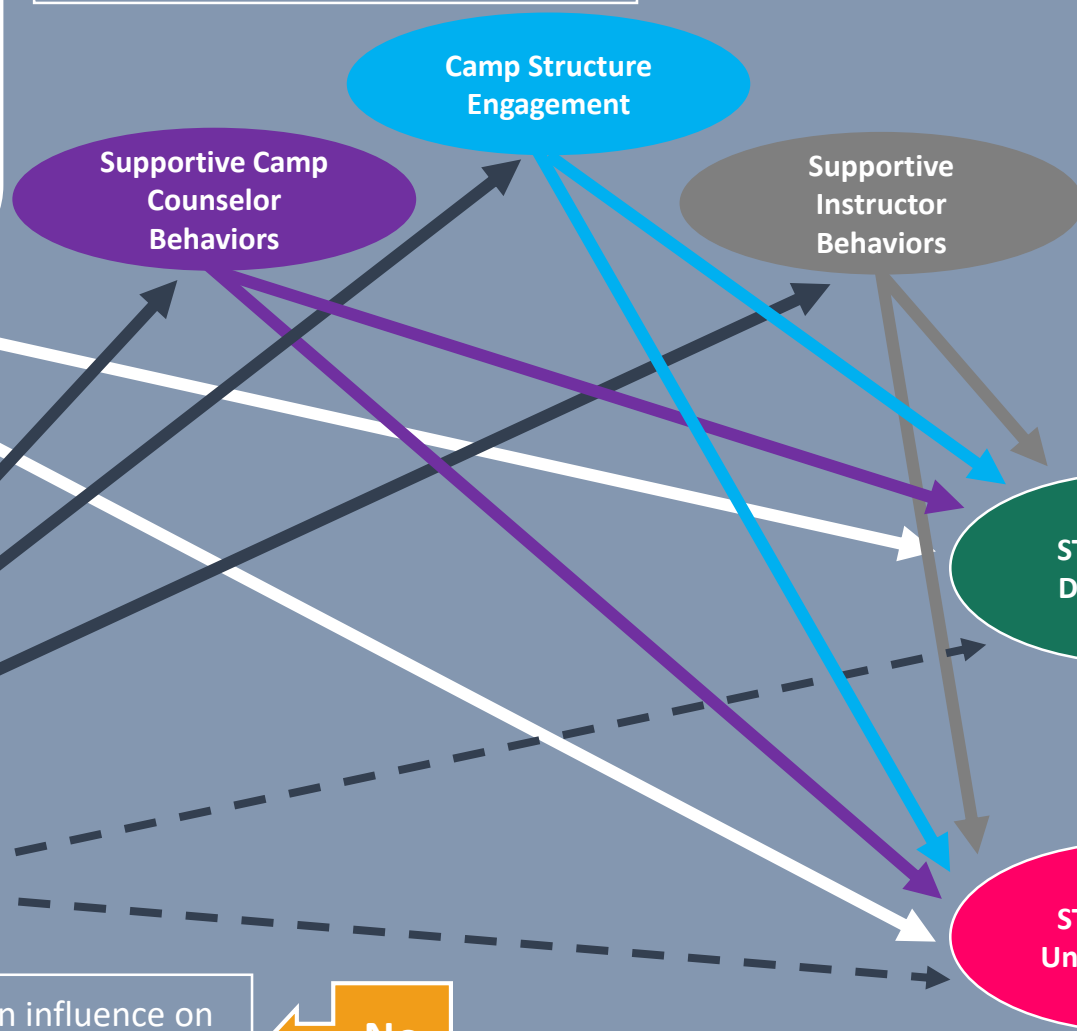

Sample Description
 $N = 365$ Campers
 M Age = 15.58
51.8% Male
69.8% White

Camper Gender
Male = 0; Female = 1

RQ2: Do socioemotional skills, camp structure, or camp staff behaviors influence STEM Career Decidedness?

A little

RQ3: Do socioemotional skills, camp structure, or camp staff behaviors mediate the relation b/x camper gender and STEM Decidedness/Undecidedness?

No

Do you want to know more?

Of Course!
